

KYLA M. TUBIANOSA

Graphic Designer and ICT

0991 - 178 - 2547 | tubianosakyla@gmail.com | 422 F. Dela Cruz St. Cavite City

Professional Summary

Detail-oriented Bachelor of Science in Information Technology graduate from Cavite State University – Cavite City Campus, with hands-on experience gained through an Information Technology internship at the Department of Education – Schools Division Office of Cavite City. Experienced in IT support, network troubleshooting, system deployment, user testing, technical documentation, and hardware and software support. Successfully contributed to the development and implementation of a web-based information system designed to improve office processes and data management. Demonstrates strong problem-solving, communication, teamwork, and technical support skills, with a commitment to continuous professional development and contributing effectively in an entry-level IT role.

Work Experience

Information Technology Intern (On-the-Job Training)

Department of Education – Schools Division Office of Cavite City

- Supported the development, testing, and implementation of a web-based information system for office operations.
 - Assisted with system deployment, user testing, troubleshooting, and technical documentation.
 - Performed basic network maintenance and connectivity troubleshooting to support stable daily operations.
 - Provided technical assistance for hardware, software, network, and internet-related concerns.
 - Assisted users in resolving IT issues and provided support to minimize disruptions to their work.
 - Collaborated with IT personnel and supervisors in completing technical tasks and day-to-day IT support activities.
-

Projects

Personal Database System (PDS)

- Developed a system for organizing, storing, and managing personal records and information.
- Implemented functions for adding, updating, searching, and managing records.

Web-Based Point of Sale and Inventory System

Thesis Project – Quscina Restaurant, Kawit, Cavite

- Developed a web-based Point of Sale (POS) and Inventory System designed to support the restaurant's daily operations.
 - Implemented features for order and transaction management, inventory monitoring, menu management, and user management.
 - Designed and tested system functions to help improve order processing and inventory tracking.
 - Collaborated with team members throughout system development, testing, documentation, and implementation.
